                                                                                                                                                                                                                                                                                                                                                  This is the amino acid sequence of a single chain antibody (Sab), termed $$T4$Sab1, comprising an scFv derived from murine monoclonal antibody $$T4$ (see AAW86022) and the human gl constant region. CDNA (see AAV80291) encoding the Sab has been inserted into vector pCIneo to allow expression in mammalian cells. The trophoblast cell surface antigen defined by $$T4$ is expressed at high levels on the cells of a wide variety of human tumours. The invention relates to a vector comprising a nucleotide sequence coding for a tumour interacting protein (TIP) and optionally a nucleotide sequence of interest (NOI) which encodes a protein of interest (POI), the vector being capable of delivering the NOI and/or POI to the tumour recognised by the TIP. Delivery can be in vivo or extenditors.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New vector encoding a tumour interacting protein for treating cancer - contains a desired nucleotide sequence and/or protein which recognises tumours, and is used as a gene delivery system to treat cancer.
                                                                                                                                                                                                                       Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     5
                                      The invention provides human antibodies that bind to stem cell factor (SCF) protein. SCF is also known as mast cell growth factor, steel factor or c-kit ligand. Antibodies of the invention are useful for preparing compositions for treating asthma. They are also used in gene therapy. The present sequence is human SCF antibody heavy chain variable and constant
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         AAO31101 standard;

The antibodies are useful for treating and preventing conditions associated with the Abeta peptide, such as Alzheimer's disease, Down syndrome, and cerebral amyloid angiopathy; for diagnosing diseases in humans; for determining whether a human subject will respond to treatment using humanized antibodies against Abeta; for treating, preventing and reversing cognitive decline in clinical or pre-clinical Alzheimer's disease, Down's syndrome or cerebral amyloid angiopathy; for inhibiting formation of amyloid plaques of the effects of toxic soluble Abeta species in humans. Treatment of the patients with antibody will inhibit or prevent cognitive decline typically associated with disease progression and reverses it. The present sequence represents a humanised anti-Abeta antibody 266 N56T heavy chain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 461 AA;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           266. The antibodies are useful for treating and preventing conditions associated with the Abeta peptide, such as Alzheimer's disease, Down syndrome, and cerebral amyloid angiopathy; for diagnosing diseases, Down humans; for determining whether a human subject will respond to treatment using humanized antibodies against Abeta; for treating, preventing and reversing cognitive decline in clinical or pre-clinical Alzheimer's disease, Down's syndrome or cerebral amyloid angiopathy; for inhibiting formation of amyloid plaques of the effects of toxic soluble Abeta species in humans. Treatment of the patients with antibody will inhibit or prevent cognitive decline typically associated with disease progression and reverses it. The present sequence represents a humanised anti-Abeta antibody 266 N56T heavy chain
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    New antibodies comprising a heavy chain and a light chain complementarity determining regions from antibody 266, for treating and preventing conditions associated with the A beta peptide, e.g. Alzheimer's disease
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     밁
The present invention relates to domain deleted CC49 or C2B8 antibodies. Domain deleted CC49 antibodies comprise a heavy chain human CC49 domain deleted sequence in which CH2 domain has been deleted and are reactive with tumour associated antigen (TAG)-72. The C2B8 antibodies are reactive with CD20 and comprise a heavy chain having a sequence of a derived domain deleted C2B8 construct where the CH2 domain has been deleted. Sequences of the invention are useful for imaging a neoplasm. They are also useful for treating myelosuppressed patients suffering from Hodgkin's lymphoma. Antibodies of the invention are also used to treat neoplastic disorder such as haematologic neoplasm, preferably non-lodgkin's lymphoma. Antibodies of the invention are also used to treat neoplastic disorder, colon cancer and haematologic malignancy. They are useful for reducing tumour size, inhibiting tumour growth and/or prolonging the survival time of tumour-bearing animals and for treating
                                                                                                                                                                                                                                                           Novel domain deleted CC49 antibody reactive with tumor associated -72, or C2B8 antibody reactive with CD20, useful for treating myelosuppressed patient suffering from a neoplastic disorder.
                                                                                                                                                                                                                                                                                                                                                                                Braslawsky GR,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         CC The invention relates to a dimeric antibody (I) comprising several CC monomeric subunits, where the monomeric subunits are non-covalently CC associated. (I) is useful for treating a disorder, especially immune CC disorder, and neoplastic disorder such as relapsed Hodgkin's disease, CC resistant Hodgkin's disease high grade, low grade and intermediate grade CC non-Hodgkin's lymphomas, B cell chronic lymphocytic leukemia (B-CLL), CC lymphoplasmacytoid lymphoma (LPL), mantle cell lymphoma (MCL), follicular CC lymphoma (FL), diffuse large cell lymphoma (DLCL), Burkitt's lymphoma, CC lymphoma (FL), diffuse large cell lymphoma, angioimmunoblastic CC lymphoadenopathy, small lymphocytic B cell lymphoma, angioimmunoblastic CC diffuse small cleaved cell, large cell immunoblastic lymphoblastoma, CC small, non-cleaved, Burkitt's and non-Burkitt's, follicular, mixed small CC small, non-cleaved, Burkitt's and non-Burkitt's, follicular, mixed small CC cleaved and large cell lymphomas, in a mammal (see ABZ24017 for a CC detailed description of the various uses of (I)). The present sequence CC represents the antibody CSE10 heavy chain

The compound is used in pharmaceutical composition for the treatment of cancer, solid tumours, and as an adjuvant to surgical intervention to treat minimal residual disease. The present sequence is humanised murine antibody BIWA4 heavy chain protein used in the invention
                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 444 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          New compound useful for treatment of cancer comprises CD44 specific antibody molecule conjugated to a highly cytotoxic drug, which cleavunder intracellular conditions.

                                                                                                                                                                                                                                                                                                                                                                                                                                The present invention relates to novel antibody molecules comprising a variable region of the heavy (VH) and/or light chain (VL) of CD44v6 specific humanised antibody called BIWA8 and BIWA4. Sequences of the invention are useful for manufacturing a medicament and for treating cancer including colorectum, non-small cell lung, breast, head and neck, ovarian, lung, bladder, pancreatic cancer or metastatic cancers of the brain. They are also useful in antibody therapy. The present sequence is BIWA4/8 antibody heavy chain mature protein. This sequence is used in the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         New antibodies specific for an epitope coded by the variant exon of the CD44 gene, useful for treating cancer, including non-small cell lung, breast, head and neck, ovarian and lung cancer.
                                                                                                                                                                                                                                                                                                                                                                  Sequence 444 AA;
                                                                                                                                                                                                                                                                                                                                                                                                                     exemplification of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Claim 24; Col
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   WPI; 2003-129413/12

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 á
                                                                           The sequences given in AAR93553-54 represent the heavy and light chains respectively of a monoclonal antibody against a 65 kD antigen of human cytomegalovirus (hCMV). The DNA's encoding these sequences were amplified using the sequences given in AAT18040-58. The monoclonal antibody may be used in the diagnosis of hCMV
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         WPI; 1996-154852/16.

RF-2 is a human monoclonal antibody (hMAb) specific for the fusion protein of respiratory syncytial virus (RSV). The polypeptide can be produced in eukaryotic host (e.g. CHO) cells transfected with vector NEOSPLA incorporating a DNA construct (AAT61279) including the RF-2 VH sequence. RF-1 and RF-2 heavy and light chains (see also AAW11638-40) are similarly produced. The transfected host cells provide a constant, stable supply of anti-RSV F-protein hMAbs for use in the treatment or prevention of RSV infection

Novel fusion protein constructs comprise a fibroblast growth factor (FGF) receptor (FGF-R) extracellular domain (ECD) lacking the immunoglobulin (Ig) I segment fused to a heterologous oligomerization domain that comprises an immunoglobulin Fc region, hinge region, CH1, CH2, CH3 or CH4 region, or light chain of an immunoglobulin molecule, or a peptide with a leucine zipper motif. The Ig I segment is not necessary for binding of
                                                                                                    New polypeptide comprising a fibroblast growth factor receptor extracellular domain fused to a heterologous oligomerization doma treating FGF-, angiogenesis-, or FGF receptor-mediated disorders.

The Ig I deletion further increases the affinity for aFGF and heparin, protects the core of the molecule from proteolysis, and abrogates the heparin requirement for aFGF binding. The new fusion polypeptides are better FGF inhibitors than FGF-R monomer proteins. The FGFR-Ig Fc fusion dimers are active as FGF antagonists at subnanomolar concentrations and were 20-fold more potent than the FGF-R monomer protein as competitors of bFGF binding to immobilized FGF-Rs. The fusion constructs are useful to treat FGF-, angiogenesis-, or FGF-R. The fusion constructs are useful to treat FGF-, angiogenesis-, or FGF-R mediated disorders, such as tumourigenesis (e.g. bladder, breast, lung, rectal, testis and cervical tumours), neovascularization (e.g. diabetic retinopathy, neovascular glaucoma, wound healing and corneal scarring) and byper-proliferation of vascular smooth muscle cells (e.g.

                                                                                                                                                                                                                                                                                                                                                  밁
                                                                                                                                                                                                                                                                                                                                                                                                   CC receptor (FGF-R) extracellular domain (EGD) lacking the immunoglobulin (CI) I segment fused to a heterologous oligomerization domain that (CI) I segment fused to a heterologous oligomerization domain that (CC comprises an immunoglobulin Fc region, hinge region, CH1, CH2, CH3 or CH4 (CC comprises an immunoglobulin Fc region, hinge region, CH1, CH2, CH3 or CH4 (CC region, or light chain of an immunoglobulin molecule, or a peptide with a CC leucine zipper motif. The Ig I segment is not necessary for binding of CC acidic FGF and basic FGF (bFGF). The Ig I deletion further increases the affinity for aFGF and heparin, protects the core of the molecule from CC proteolysis, and abrogates the heparin requirement for aFGF binding. The CC mew fusion polypeptides are better FGF inhibitors than FGF-R monomer roteins. The FGFR-Ig Fc fusion dimers are active as FGF antagonists at subnanomolar concentrations and were 20-fold more potent than the FGF-R CC monomer protein as competitors of bFGF binding to immobilized FGF-Rs. The fusion constructs are useful to treat FGF-, angiogenesis-, or FGF-R-CC mediated disorders, such as tumourigenesis (e.g. bladder, breast, lung, crectal, testis and cervical tumourigenesis (e.g. bladder, breast, lung, crectal, testis and cervical tumourigenesis (e.g. bladder, breast, lung, crectal, testis and cervical tumourigenesis (e.g. bladder, breast, lung, crectal, testis and cervical tumourigenesis (e.g. bladder, breast, lung, crectal, testis and carrior) and more above the machine astronesis (e.g. diabetic rectal or testis and carrior) and more above the machine astronesis (e.g. diabetic rectal or testis and carrior) astronesis (e.g. diabetic rectal or testis and carrior) astronesis (e.g. diabetic rectal or testis and carrior) astronesis (e.g. diabetic rectal or testis and carrior) and more above the machine astronesis (e.g. diabetic rectal or testis and carrior) astronesis (e.g. diabetic rectal or testis described experisor) and corneal scarring) and corneal scarring)
                                                                                                                                                                                                                                                          Matches 276;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Novel fusion protein constructs comprise a fibroblast growth factor (FGF) Creceptor (FGFR) extracellular domain (ECD) lacking the immunoglobulin CC (1g) I segment fused to a heterologous oligomerization domain that comprises an immunoglobulin Fc region, hinge region, CH1, CH2, CH3 or CH4 cregion, or light chain of an immunoglobulin molecule, or a peptide with a leucine zipper motif. The Ig I segment is not necessary for binding of acidic FGF and basic FGF (bFGF). The Ig I deletion further increases the finity for aFGF and heparin, protects the core of the molecule from proteolysis, and abrogates the heparin requirement for aFGF binding. The CC new fusion polypeptides are better FGF inhibitors than FGF-R monomer repotein as competitors of bFGF binding to immobilized FGF-R. The subnanomolar concentrations and were 20-fold more potent than the FGF-R monomer protein as competitors of bFGF binding to immobilized FGF-Rs. The fusion constructs are useful to treat FGF-, angiogenesis-, or FGF-R- mediated disorders, such as tumourigenesis (e.g. bladder, breast, lung, cretain, testis and cervical tumourigenesis (e.g. bladder, breast, lung, cretainopathy, neovascular glaucoma, wound healing and corneal scarring) and hyper-proliferation of vascular smooth muscle cells (e.g.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Matches

                                                                                                                                                              The specification describes the use of a single chain antibody (ScFv), which is capable of recognizing a disease associated molecule in the manufacture of a medicament for the prevention and treatment of a disease condition. The ScFv antibody is useful in the manufacture of a medicament, for affecting a disease in vivo, for preparing a pharmaceutical composition, for in vivo imaging and/or for adjuvant treatment of a disease. The ScFv antibody is also useful for treating inflammatory diseases including arthritis, hypersensitivity, autoimmune diseases, cancers, central nervous system disorders including Parkinson's disease, periodontal diseases, cardiopulmonary diseases, cardiovascular diseases, pastrointestinal disorders, infections, diabetes, Helicobacter-related diseases, and other immune disorders. The present sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          á
This invention relates to a new antibody library which comprises at let 100 cells, each of which comprises at least one integrated retroviral vector expressing an antibody light or heavy chain. Antibodies are of increasing importance in human therapy, assay procedures and diagnosti methods and a need exists for efficient methods of generating and

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              screening antibody libraries containing large numbers of antibodies. The antibody library of the invention addresses this need, with the additional advantage of strict control over multiplicity of infection (MOI), and is useful in preparing a composition for diagnosing or treating a wide variety of disorders. The present sequence is the amino acid sequence of the LIARICF protein, which was encoded by the Gateway retroviral vectors used in the exemplification of the invention.

F19 (ATCC Accession number HB 8269)
CC is a murine monoclonal antibody against fibroblast activation protein
CC alpha (FAP). FAP is a cell surface molecule of reactive stromal
CC fibroblasts, and its induction is a highly consistent molecular trait of
CC the reactive stroma of many types of epithelial cancer. Although F19 may
CC be useful in vitro, e.g., for diagnosis, its applications for in vivo use
CC in humans are problematic as it elicits a human anti-mouse response which
CC reduces the efficacy of the antibody in patients and impairs continued
CC administration. This chimeric antibody was humanised by joining entire
CC murine variable regions to human constant regions. However, humanised
CC antibodies produced by this method can still elicit an anti-mouse
CC response in humans, whereas antibodies humanised via CDR (complementarity
CC determining region) grafting are less immunogenic in humans. Humanised
CC response in humans antibodies are useful for treating cancers e.g., colorectal cancers,
CC ovarian cancers, lung cancers, breast cancers, head and neck cancers,
CC ovarian cancers. They are also useful for the detection of activated
CC stromal fibroblasts in a healing wound, inflamed skin or a tumour in a
CC human patient. (Updated on 17-0CT-2003 to standardise OS field)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   erythematosus, $jogrens syndrome, immune thrombocytopenic purpura, as psoriasis, scleroderma, cancer and inflammatory bowel disease such as Chron's disease and ulcerative colitis. The fusion protein retains the ability to participate in well known immunological effector activities including antibody dependent cell mediated cytotoxicity and/or complement fixation in complement dependent cytotoxicity, despite having structures that would not be expected to be capable of promoting the effector activities. It can be produced in substantial quantities that are typically greater than those routinely attained with single-chain antibody constructs. This is the amino acid sequence of a chimeric fusion protein created from the mouse anti-human CD20 single chain antibody variable fragment (scFv) and the human immunoglobulin G (IgG) fragment of crystallisation (Fv) tail, wild type hinge, CH2 and CH3 domains
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       polypeptide. The fusion protein is useful for treating a subject having or suspected of having a B-cell disorder or malignant condition e.g. rheumatoid arthritis, myasthenia gravis, Grave's disease, Hashimoto's thyroiditis, type I diabetes mellitus, multiple sclerosis, systemic lupus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 499
                                                                                                             366
                                                                                                                                                   373
                                                                                                                                                                                                                             313

comprising a binding domain polypeptide, an immunoglobulin fusion protein CC immunoglobulin hinge region polypeptide, an immunoglobulin heavy chain CC CH2 constant region polypeptide that is fused to the CH2 constant region polypeptide, and an immunoglobulin heavy chain CC polypeptide, and an immunoglobulin heavy chain CH3 constant region polypeptide, derived from (a) having 3 or more region polypeptide, derived from (a) having 3 or more cysteine is mutated human IgG1 immunoglobulin hinge region polypeptide, derived from (a) having 3 or more cysteine is not mutated human IgG1 immunoglobulin hinge region polypeptide, derived from (a) having 3 or more cysteine is not mutated, a mutated human IgG1 immunoglobulin hinge region polypeptide, derived from (a) having 3 or more cysteine is not mutated, a mutated human IgG1 immunoglobulin hinge region polypeptide, derived from (c) having 3 or more cysteine residues; where cysteine residues, where the mutated human IgG1 immunoglobulin hinge region polypeptide contains no more than one cysteine residue; where constitute the cysteine residues, where the mutated human IgG1 immunoglobulin hinge region polypeptide contains or polypeptide, derived from (c) having 3 or more cysteine residues; where constitute the service of immunoglobulin hinge region polypeptide contains or ocysteine residues. The binding domain-immunoglobulin fusion protein is capable of at least one immunoglobulin hinge region polypeptide contains or comparising the polypucleotide doplymucleotide encoding the binding domain-immunoglobulin fusion protein, a recombinant expression construct comprising the polypucleotide (operably linked to a promoter), a host cell transformed or transfected with a recombinant expression construct, producing the binding domain-immunoglobulin fusion protein, a protein or polypucleotide are an isolated polymucleotide in a binding domain-immunoglobulin fusion protein, a protein or polymucleotide and a carrier, and treating a subject construct of the binding domain-immunoglobulin fus
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        17-JAN-2001;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                immunoglobulin fusion protein-associated protein sequence. Note: The sequence data for this patent formed part of the printed specification and is also available in electronic format directly from USPTO at sequence.html?DocID=20030118592. The authors have not identified the sequences in the printed specification by their SEQ ID number therefore none of the sequences can be explicitly identified.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             comprising a binding domain polypeptide that is fused to an immunoglobulin hinge region polypeptide, an immunoglobulin heavy chain CH2 constant region polypeptide that is fused to the hinge region polypeptide, and an immunoglobulin heavy chain CH3 constant region polypeptide, and an immunoglobulin heavy chain CH3 constant region polypeptide. The polypeptide that is fused to the CH2 constant region polypeptide. The
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    subject having or suspected of having a malignant condition or a B-cell disorder, e.g. melanoma, carcinoma or sarcoma, rheumatoid arthritis, myasthenia gravis, Grave's disease, type I diabetes mellicus, multiple sclerosis or autoimmune disease. The present sequence is a binding doma
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  New binding domain-immunoglobulin fusion protein, useful for treating a subject having or suspected of having a malignant condition or a B-cell disorder, e.g. melanoma, Grave's disease or autoimmune disease.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              CC The present sequence is that of a preferred heavy chain of a humanised CC antibody of the present invention. In the variable region of this CC sequence, the complementarity determining regions (CDRs) originate from CC murine monoclonal antibody 3D6 and the framework region from human CC germline VH segment DP-45 and J segment JH4. Novel humanised antibodies CC of the invention have CDRs from 3D6 and human framework sequences. These CC humanised antibodies have binding affinities (affinity and epitope CC location) approximately the same as those of the mouse 3D6 antibody. The CC invention includes antibodies, single chain antibodies, and their CC fragments, as well as nucleotide sequences, vectors, transformed host CC cells, and methods of using the humanised antibody to treat, prevent, CC alleviate, reverse or otherwise ameliorate symptoms and/or pathology CC associated with Down's syndrome, (pre-)clinical Alzheimer's disease or CC (pre-)clinical cerebral amyloid angiopathy, and to inhibit formation or reduce Abeta plaque in the brain. (Updated on 23-OCT-2003 to standardise CC OS field)

                                                                                                                                                                                                                                                            The human monoclonal antibody D7C2, of isotype IgM, recognises a 30-32 kD polypeptide on the membrane of rhesus positive red blood cells. The antibody agglutinates rhesus positive cells but not rhesus negative cells and is useful diagnostically and also for preventing haemolysis in newborn rhesus positive babies. Recombinant IgM-D7C2 can be produced by insect cells which have been transformed by a baculoviral vector comprising a D7C2 expression cassette. The present sequence is that of a recombinant IgM-D7C2 heavy chain fused downstream of a mouse VH signal
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            rhesus po

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       5
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     S
                                                2 Polypeptides (AAW01821 and AAW01822) respectively comprise primatised forms of the light and heavy chains of cynomolgus monkey anti-human B7.1 antigen monoclonal antibody 16C10. Cloned 16C10 light and heavy variable genes (see also AAT62512 and AAT62513) are inserted into an expression vector (pref. NEOSPLA) which contains human light and heavy chain constant region genes to allow prodn. of the primatised antibody in e.g. CHO cells. Primatised 7C10 and 7B6 anti-B7.1 antibodies have also been produced (see also AAW01817-20). The primatised antibodies inhibit the B7:CD28 pathway, making them useful immunosuppressants for the treatment of autoimmune disorders and graft-versus-host disease.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             This sequence represents a primatized form of the antibody 16C10 heavy chain from macaque. This sequence is used in a method which studies new monoclonal antibodies (MAb's) that bind selectively to 87.1 (CD80) or to 87.2 (CD80) antigens and inhibits binding of these antigens to CD28. Such Mab's are specific immunosuppressants for treatment of diseases involving T cell/B cell interactions, particularly autoimmune disease, specifically idiopathic thrombocytopaenia purpura, systemic lupus erythematosus, type I dispathic thrombocytopaenia purpura, systemic lupus erythematosus, type inflammatory bowel disease, allergy and multiple sclerosis, graft vs. host diseases, B cell lymphoma, infections (including by human immune deficiency virus) or inflammatory disease and tumours. Optionally the MAb can be conjugated to a drug or toxin. MAb's, or their fragments, can also be used as imaging agents and as vaccines or immunogens to develop antidiotype reagents. MAb's are optionally combined with other proteins or small molecule immunosuppressants. Blocking B7/CD28 interactions induces long-term, antigen-specific immunosuppression, i.e. it inhibits production of interleukin-2 (IL-2), T cell proliferation and antigen-specific immunoglobulin G (IgG) responses

                                                                                                                                                                                                                                                                                                                                                                 purpura, systemic lupus, erythematosus, type 1 diabetes mellitus, renumatoid arthritis, psoriasis, aplastic anaemia, inflammatory bile disease, allergy, multiple sclerosis or graft-vs-host disease. The antibody is useful for immunosuppression in a human or animal and for treating or preventing resistance to or rejection of transplanted organ or tissue for treating proliferative and hyperproliferative diseases, for treating reversible obstructive airways disease, intestinal inflammations and allergies e.g. Crohn's disease and ulcerative colitis, food-related allergies e.g. migraine, rhinitis and eczema, and other types of allergies. The present protein sequence represents the heavy chain of 16C10, a primatised antibody used in the invention to induce apoptosis and inhibit production of interleukin-2 (IL-2)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       The present invention relates to a new use of a monoclonal antibody which specifically binds to B7.1 antigen (CD80) and/or B7.2 antigen (CD86) for inducing the apoptosis of B7+ cells. The invention is useful for treating diseases such as B cell cancer, lymphoma, a cancer where B cells promote the growth and/or metastasis of tumours, B cell lymphoma, B cell leukaemia, and autoimmune diseases such as idiopathic thrombocytopenia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Use of monoclonal antibody which specifically binds to B7 and/or B7.2 antigen CD86 for inducing apoptosis of B7+ cecancer, graft-vs-host disease and autoimmune disease such
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Human; macaque monkey; light chain; primatised antibody; 16C10 antibody; neuroprotective; apoptosis inducer; allergy; CD28 receptor antagonist; B7_1 antigen; CD80; B7_2 antigen; CD86; B cell cancer; metastasis; tumour; B cell lymphoma; B cell leukaemia; autoimmune disease; cell lymphoma; B cell leukaemia; autoimmune disease; inmunosuppression; organ rejection; interleukin-2

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                8
The invention relates to a binding domain-immunoglobulin fusion protein comprising a binding domain polypeptide that is fused to an immunoglobulin hinge region polypeptide, an immunoglobulin heavy chain CH2 constant region polypeptide that is fused to the hinge region polypeptide, and an immunoglobulin heavy chain CH3 constant region polypeptide, and an immunoglobulin heavy chain CH3 constant region polypeptide that is fused to the CH2 constant region polypeptide. The hinge region polypeptide comprises: a wild-type human IgG1 immunoglobulin hinge region polypeptide; a mutated human IgG1 immunoglobulin hinge region polypeptide, derived from (a) having 3 or more cysteine residues; where the first cysteine is not mutated; a mutated human IgG1 immunoglobulin hinge region polypeptide contains 2 cysteine residues, where the first cysteine is not mutated; a mutated human IgG1 immunoglobulin hinge region polypeptide.
                                                                                                                                                                                                                                                                                         New binding domain-immunoglobulin fusion protein, useful for treating a subject having or suspected of having a malignant condition or a B-cell disorder, e.g. melanoma, Grave's disease or autoimmune disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                17-JAN-2001; 2001US-0367358P
